

**Job Title:** Geologist/Engineer in Training

**Job Status:** Full Time

**Location:** PA

Stell is a seasoned veteran- and woman-owned small business providing expertise and innovation across the resilience, environmental, restoration, and compliance service sectors. We offer an excellent benefits package that includes medical/dental insurance, 401k opportunities, and paid time off.

**Position Overview:**

The Geologist/Engineer in Training conducts environmental sampling, evaluates and analyzes data, and assists with technical report writing while working in an effective team environment to meet project goals and objectives.

**Responsibilities:**

- Participate in site investigation field activities, including but not limited to environmental site assessments; hazardous waste site investigations; field sampling (soil, groundwater, surface water and air); Phase I/II environmental site assessments; permitting; and remedial oversight.
- Conduct data analyses and reduction of field and analytical data.
- Support the preparation of technical reports including but not limited to proposals, environmental reports, permit applications, work plans, health and safety plans, and other written deliverables.
- Gather technical data using computer-based programs to support environmental document development.
- Provide high technical quality and safe job performance.
- Project related travel and ability to work 10 to 12-hour days in the field are required

**Qualifications (Education and Experience):**

- Minimum Bachelor's degree in geology, environmental science, or related scientific discipline. MS is a plus. Current 40-hour OSHA/HAZWOPER training, current 8-hour OSHA/HAZWOPER refresher and Site Supervisor Training a plus.
- Five years of technical experience for an environmental firm.
- Experience in work plan preparation and technical report writing. Solid technical writing skills required (writing sample may be requested).
- Experience executing field investigations with minimal supervision.
- Knowledge of state and federal regulations (CERCLA, RCRA, state regulations in PA, NJ, NY, and other states in the Mid-Atlantic Region).
- Permitting experience desirable.

- At least one statistics course and excellent data analysis skills are required.
- EIT or similar certification would help distinguish you as a candidate.
- Adherence to H&S and QA/QC processes and protocols and use of GIS/GPS technologies.
- Must be detail oriented, and a team player with good communication and time management skills.
