

**Job Title:** Project Geologist

**Job Status:** Full-Time

**Location:** Metropolitan Philadelphia, PA area

Stell Environmental is a growing and fast-paced woman-owned business that provides environmental planning, management and consulting services to public and private sector clients nationwide. We offer an excellent benefits package that includes medical/dental insurance, 401k opportunities, and paid time off.

### **Overview:**

The Project Geologist is responsible for direction of field investigations of legacy projects as well as future potential project impacts on soil and groundwater. He or she is responsible for client contact, study design, supervision of work plan preparation and execution of field projects that include environmental sampling of different media. The Project Geologist analyzes and interprets data, directs midlevel and support staff in report preparation while providing senior leadership and mentoring interfaces with clients, and assists with business development within the sector.

### **Responsibilities:**

- Direct site investigation field activities, including but not limited to environmental site assessments; hazardous waste site investigations; field sampling (soil, groundwater, surface water and air); Phase I/II environmental site assessments; evaluation of remedial action alternatives for contaminated soil and groundwater and remedial oversight.
- Conduct data analyses and interpretation of field and analytical data.
- Prepare technical reports including but not limited to proposals, environmental reports, permit applications, work plans, remedial investigation reports, feasibility studies, and health and safety plans.
- Select and manage subcontractors.
- Help develop existing clients and identify new ones, prepare budgets, scopes of work, and schedules for projects and proposals. Develop, review, and produce task order proposals, progress reports, and project deliverables.
- Monitor and conform to budget, schedule, and performance goals.
- Some project related travel and ability to work 10 to 12-hour days in the field are required

### **Qualifications:**

- BS / BA in Geology, Environmental science or a related field, MS in Geology preferred.
- P.G. license preferred in at least one state
- 8+ years of technical experience.

- Excellent organizational, oral, written, and analytical skills.
- Knowledge and skills in the following: (1) CERCLA, RCRA, OSHA, Pennsylvania and New Jersey state regulations, and other relevant federal and state regulations and guidance; (2) MS Office Suite; (3) sampling, analysis, and other field protocols; and (4) use of GIS/GPS technologies.
- Experience and expertise with groundwater modeling (e.g. MODFLOW, contouring programs, SESOIL) a plus.
- Experience and expertise with the Operational Range Assessment Program a plus.
- Experience in design of treatment systems desirable.
- 40-hour HAZWOPER certification and current 8-hr refresher a plus.

*All qualified applicants will receive consideration for employment without regard to their race, color, religion, sex, or national origin.*
